

PF 360 Print (InfinityCloud) and Infinity Suite vPad Pro 2 Secure Release Station

The vPad Pro 2 is a key component to the PF 360 Print and Infinity Suite SecurePrint experience. Our IoT device allows you to securely release print jobs to any brand of printer, thereby increasing security and cutting down on wasted paper.

How It Works

The user prints to the SecurePrint Queue, just like any other printer. The job is securely stored, in the cloud or on-premises depending on which version you are using. The print job is compressed and encrypted. The user authenticates at the vPad and the job is sent to vPad, uncompressed and unencrypted and delivered over LAN to the printer.

Advantages For You

- No print data is stored on the vPad Pro 2 or in the printer hard drive. SecurePrint through vPad eliminates possible security breaches of sensitive print data, such as patient health records and personal financial profiles, should theft or decommissioning of the vPad or printer hardware occur.
- One vPad can handle many simultaneous print jobs and can be set up with multiple printers as end points.
- Because the jobs are only physically printed when the user is at the printer, waste from reprinting jobs is reduced and privacy increased.
- Users can print from anywhere and release the jobs the next time they are in the office.

Key Features & Benefits

- ✓ Easy to install and integrate into your PF 360 Print/Infinity Install
- ✓ Wi-Fi and touch screen that is Capacitive (human touch) vs Resistive (pressure)
- ✓ POE(power over ethernet)
- ✓ Compatible with external HID/RFID devices
- ✓ Compatible with all printer makes and models
- ✓ Enforce secure printing both in the head office and at all remote locations
- ✓ Allow users to "Tap and Print" securely, on demand
- ✓ Improve enterprise workflow through follow-the-user printing
- ✓ Solve remote printing and bandwidth issues with print server centralization
- ✓ Provide one-to-multiple printers support, and work with printers of any make or model, providing quick ROI
- ✓ Compatible with any RFID/HID smart card or key fob; no customization is required
- ✓ Support PF 360 Print (InfinityCloud) and Infinity Suite managed print software for any computing environment

Technical Specifications

Touch Screen vPad Pro 2

- ✓ 8-Core ARM Cor-tex A7 CPU, 1.2Ghz
- ✓ 2GB SDRAM
- ✓ 8GB NAND Flash
- ✓ Second ethernet port
- ✓ DC IN Power Terminal (9V-36V)
- ✓ Ethernet Interface (RJ45) X2
- ✓ USB
- ✓ 7-inch capacitive touch screen, TFT LCD (1024×600)
- ✓ Two Speakers 2×1 Watt (Integrated 3W Amplifier For External Speakers)
- ✓ 0.7 lbs (330 g)
- ✓ Top: Black; Base: Black
- ✓ DC 9V – 36V; POE; IEEE802.3af; 48V
- ✓ WIFI (802.11b/g/n), BT V2.1+EDR/BT v3.0/BT
