PF 360 Connector App

Workflow
Reimagined

Seamless, Secure Printing— Right from Your MFD

The PF 360 Connector App is a purpose-built application that integrates directly with Xerox, HP, Ricoh, and Lexmark multifunction devices (MFDs), enabling secure pull printing through the PF 360 Print SecurePrint Queue. Users can authenticate at the MFD touchscreen to securely release print jobs on demand.

In addition to improving document security and operational efficiency, the Connector App helps reduce wasteful printing, hardware usage, and energy consumption. From a single, intuitive interface on the MFD control panel, users can access native functions like copy, fax, and scan to email, along with enhanced capabilities such as scan to SharePoint, OneDrive, Google Drive, SecurePrint, PF 360 SecureMail, and PF 360 Capture.

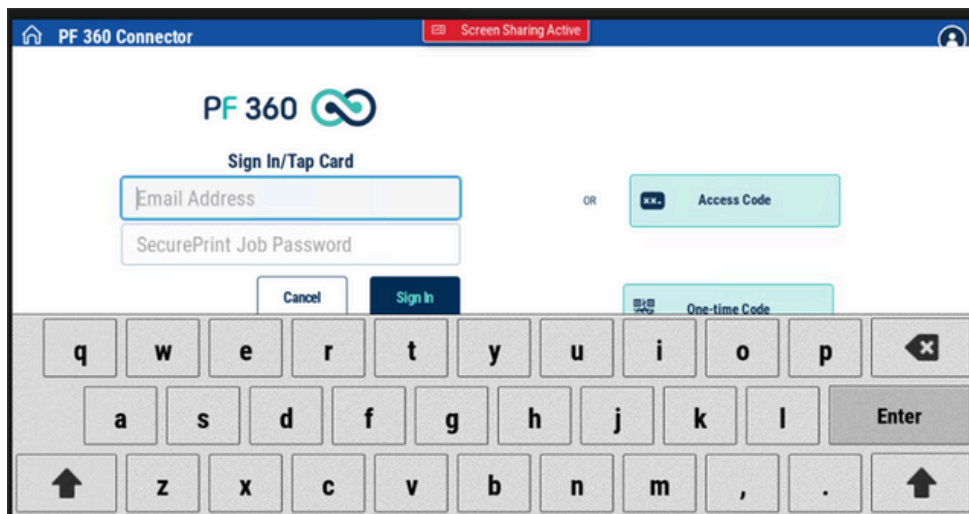

All the key benefits of PF 360 Print are included, such as simplified printer management, accurate printer mapping, and comprehensive print auditing. Each Connector App is tailored to its specific MFD manufacturer. Contact us to find out which models are supported.

Key Benefits

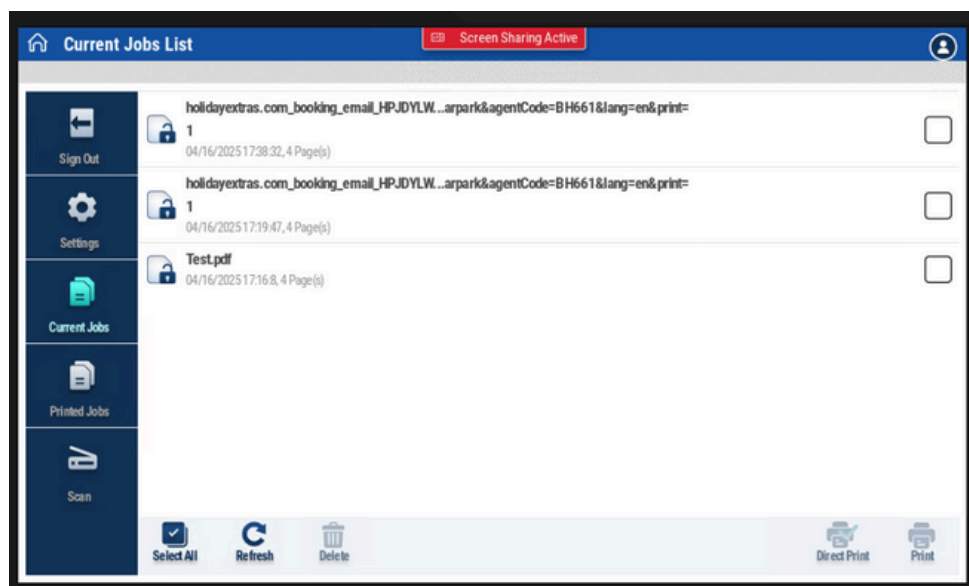

- Users can release print jobs securely and on demand to any MFD on the corporate network
- Organizations can deploy secure pull printing in a multi-vendor MFD infrastructure
- Seamless interoperability and product familiarity with a single intuitive interface on the MFD control panel
- Increased ROI and print cost savings through reduction of MFD hardware and wasteful printing
- Option to use card reader to authenticate SecurePrint
- Scan to multiple destinations—including SharePoint, OneDrive, and Google Drive—with usage tracking and reporting

Supported MFP Platforms and Models

- Ricoh SmartSDK
- Xerox Extensible Interface Platform (EIP)
- HP Open Extensibility Platform – Device Layer (OXPd)
- Lexmark Embedded Solutions Framework (ESF)

The PF 360 Connector ensures a secure, flexible authentication experience.

Release, delete, or manage prints directly from the MFD—no IT support needed.
