Process Fusion 360: Simplify Your Business Processes

Process Fusion 360 is a secure cloud-managed platform that helps organizations automate their business processes by simplifying the way people work with documents, print, and digital data.

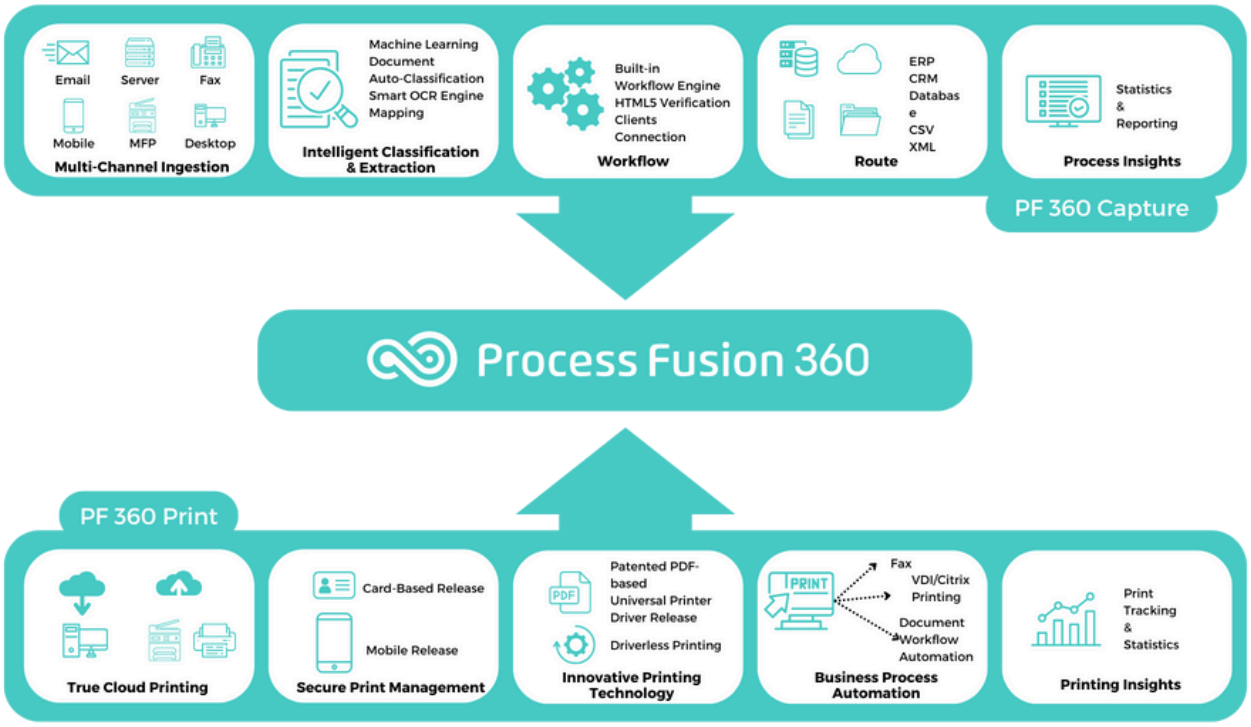
By combining our intelligent process automation and cloud printing technologies into a single end-to-end digital platform, businesses can eliminate the need for manual document processes and traditional printing. So, whether staff are working at home or in the office, PF 360 enables a seamless hybrid office solution that simplifies document workflows, provides better team collaboration and improves business outcomes.

PF 360 Print: Disrupting Print

The PF 360 Print Module provides a secure cloud print management platform simplifying how business traditionally print.

With this module organizations can migrate all printers and their printer data from their print servers into a fully managed and supported Cloud infrastructure.

By eliminating the need for costly print servers, enabling simple management of drivers and allowing centralized management of direct IP printing, organizations can provide a simple printing experience with full control over print.

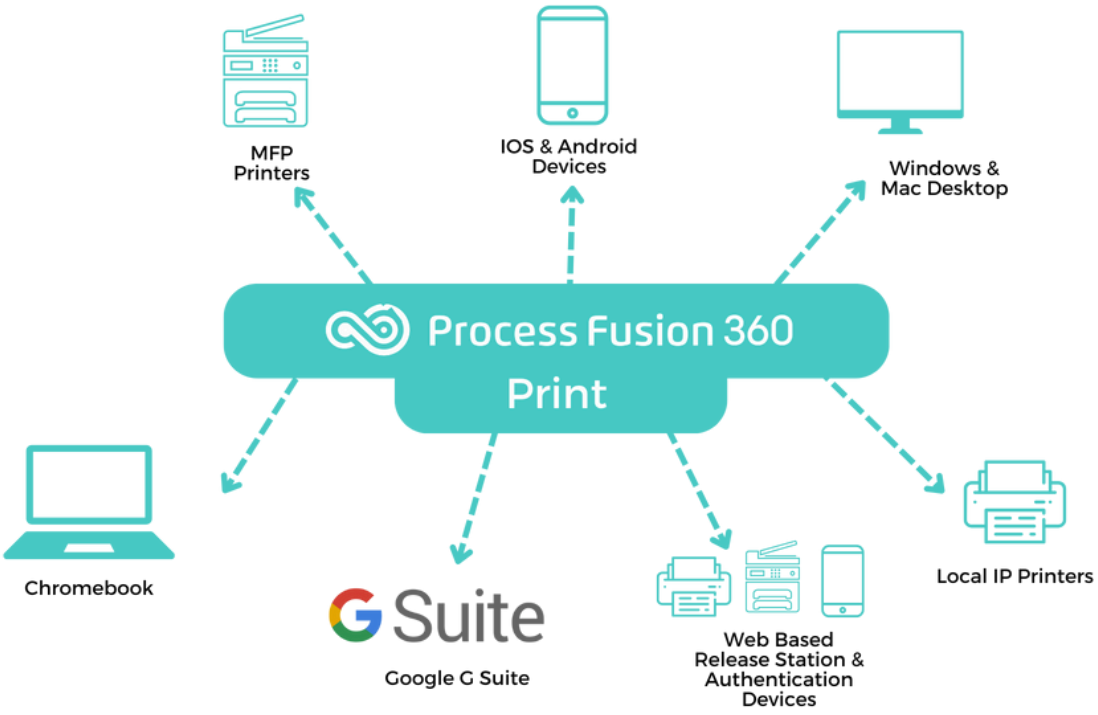


Key Benefits

- Seamless Home and Office Printing Experience
- Security and Compliance
- Simple administration of printers, drivers, and users
- Fast Deployment of Print Drivers to Printers
- Reduced Print-Related IT Support Costs
- Removal of Costly Physical Print Servers

Key Features

- Print Driver Management
- Print Server Migration Tool
- Patented PDF-based Universal Printer Driver
- Centralized Direct IP Management
- G-Suite & Azure AD Authentication
- Chromebook & Home Printing
- VDI & Citrix Printing • Auditing & Reporting
- Secure Contactless Mobile Printing
- Embedded MFP App



PF 360 Capture: Re-engineering Document Processes

The PF 360 Capture Module provides intelligent document processing, which re-engineers manual document processes, helping organizations to save both time and money, by eliminating inefficiencies and errors from your business.

This module offers multi-channel ingestion, machine learning, Document Auto, classification, smart OCR engine mapping capabilities including built-in workflows that can handle every type of document, from simple forms to complex free-form documents.

It can also feed content-driven business applications such as RPA,ECMs, EFSS, ERPs and EHR helping organizations focus on customer service, cost reduction and compliance.

Key Benefits

- 100% Cloud Managed
- Supports both Physical & Digital Input
- Able to handle High and Low Volume
- No Need to Create Invoice Templates
- Reduced Data Errors
- Lower Processing Costs and TCO
- Fast Deployment without Hardware
- Greater Process and Status Visibility

Key Features

- Secure Contactless Capture
- Multi-Channel Ingestion
- Machine Learning and Advanced Recognition
- Automated Classification and Extraction
- Smart OCR Engine Mapping
- Built-in Workflows
- Advanced Tracking and Analytics
- Multi-App Integrations
