

ESSENTIAL CHECKLIST

ENTERPRISE PRINTING

29 Questions You Should Ask
When Comparing Enterprise
Printing Solutions

Going through the process of selecting an enterprise printing solution isn't easy...

Many third party printing solutions may seem similar on the surface, but once you dig deeper into the specific requirements that your environment needs, you will find they are very different. This guide is meant to help walk you through your decision-making process and to keep in mind what questions to ask when deciding if an enterprise printing solution is the right fit for you.

Software Testing:

- Do you provide a free trial of your product?
- Does your free trial provide full functionality?
- Can you extend free trials after the set date?
- Do you provide IT support during free trials?
- What are the minimum system requirements?

Purchasing:

- Is your product developed in-house? If not, who is it outsourced to?
- How is your software licensed?
- Do you provide 24/7 IT support?
- Do you provide post-sales training for system administrators?
- Are there any enterprise customers that we may contact?

Product Offering:

- What type of architectures do you support?
- What different databases do you support?
- What file format does your universal print driver support?
- Do you provide bandwidth optimization?
- Do you provide redundancies or is it fault tolerant?

- Do you support serverless printing?
- Does your product provide print tracking and archive printed documents?
- Do you provide custom printer profiles?
- Do you provide secure pull printing / follow me printing?
- Do you provide card swipe identification functionality? Which card readers do you support?
- Is there a mobile printing option? Is it available for iOS, Android and Chromebook?
- Do you have mobile print release?
- Do you support guest printing / email to print?
- Is rule based printing an option?
- Do you provide specialty printer support?
- Do you provide delegate printing?
- Is there any features of functionality lost from printing vendor to vendor?
- Is there a cloud based version? Is it compatible with Azure, AWS, etc?
- Which single sign-on solutions do you support?
