

# SecureSignature

Sign Smarter. Work Faster. Stay Secure.  
Launch Date: June 4, 2025

## Introduction

In today's digital workplace, printing and scanning just to get a signature feels like a step backward. With SecureSignature, you can sign, send, and manage documents in a few simple clicks—no matter where you are.

Explore how SecureSignature simplifies approvals and speed up your workflow with secure, legally binding e-signatures.

The image shows a 'Confirm your Signature' dialog box from the SecureSignature application. The dialog has a title bar with a pen icon and a close button. Below the title, it says 'Securely Share Files to Sign with End-to-End Encryption'. The main content area is divided into two columns. The left column contains a PDF file icon and name 'pf02testacc+23@g\_21.05.2025\_16\_57\_26.pdf', the sender 'Sent by qauniprint@gmail.com', and a 'Full Name' field with the value 'Frank Caputo'. The right column contains an 'Expires in: 29 days' timer, a 'Sent on: May 28, 2025' timestamp, and an 'Initials (Rubric)' field with the value 'FC'. Below these fields are three buttons: 'Font Style' (selected), 'Draw', and 'Upload'. To the right of these buttons is a 'Change Font Style' dropdown. The bottom section of the dialog is split into two preview areas: 'Signature Preview' showing a cursive signature of 'Frank Caputo' and 'Initials Preview' showing the initials 'FC'. At the bottom of the dialog is a checkbox with the text 'By selecting Confirm and Sign, I agree that the signature and initials provided are an electronic representation of my signature and initials for all purposes, including use on legally binding documents.' and two buttons: 'Cancel' and 'Save'.

# Key Benefits

SecureSignature isn't just about convenience—it's about giving your team the tools to move faster, work smarter, and stay secure:

- **Sign Instantly** – Get approvals done in minutes instead of days, right from your desktop or mobile device.
- **Track Every Step** – See who has signed, who hasn't, and when—no follow-up emails required.
- **Go Paperless** – Say goodbye to filing cabinets, print queues, and manual processes.
- **Protect Sensitive Data** – End-to-end encryption keeps confidential documents safe—no more risky email attachments.
- **Transfer Large Files Securely** – Send big documents without needing external file-sharing tools.
- **Stay Compliant** – Policy-based encryption and built-in tracking support your organization's compliance and audit needs.

# Who's It For

SecureSignature is built for organizations that need a faster and more secure way to complete business-critical paperwork. It's a fit for roles like:

- Executives and business owners
- Sales professionals
- HR and recruitment teams
- Legal and compliance departments
- Finance and procurement staff
- IT and administrative users

## **Industries:**

- Professional services
- Legal and finance
- Real estate and property management
- Healthcare
- Education
- Government and public sector
- Manufacturing

## **Ideal For These Workflows**

### **✓ Sales Agreements**

Close deals faster by sending quotes, contracts, and proposals for immediate signing—without delays or courier costs.

### **✓ Employee Onboarding**

Let new hires sign NDAs, tax forms, and offer letters remotely, speeding up your recruitment process and improving their first-day experience.

### **✓ Legal and Compliance**

Simplify the approval process for waivers, confidentiality agreements, and policy acknowledgments—while maintaining full visibility and control.

### **✓ Real Estate Transactions**

From lease agreements to closing documents, SecureSignature removes the need for in-person meetings and enables faster deal flow.

### **✓ Healthcare and Public Sector Forms**

Support remote workflows by enabling patients and citizens to complete consent forms, permits, or internal approvals online.

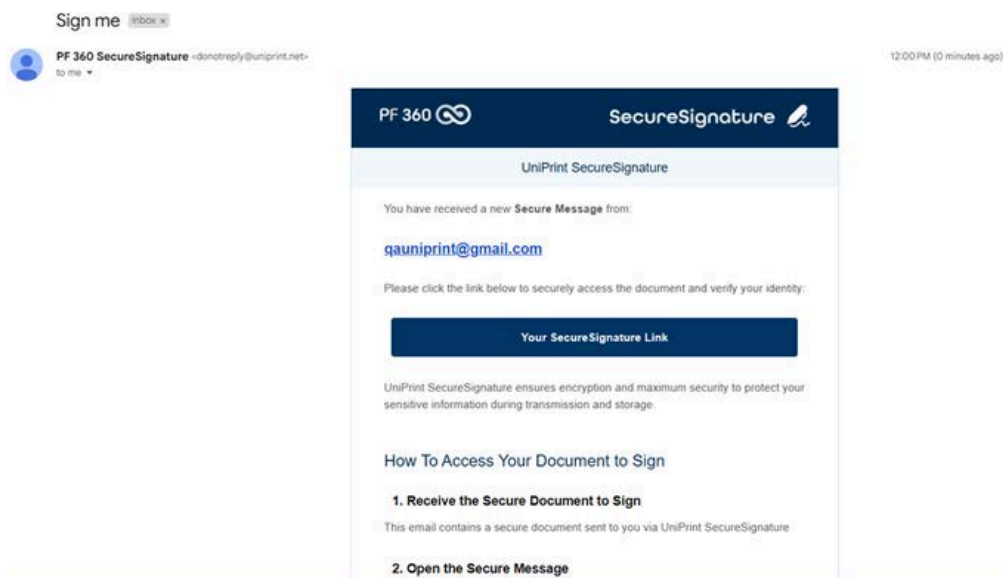

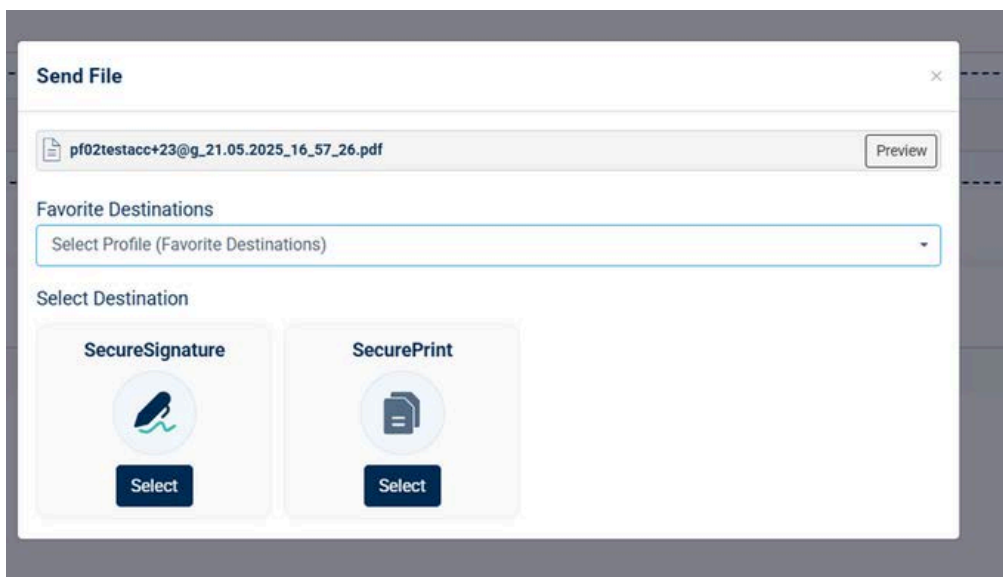

# FAQs

## 1. Is SecureSignature legally binding?

Yes, it is designed to support legally binding agreements. However, we are not yet E-SIGN or eIDAS compliant. Compliance enhancements are in progress.

## 2. Does it include an audit trail?

The first release includes real-time status tracking. A per-document audit report will be available in our upcoming v4.7 release.

## Conclusion

Many organizations still rely on outdated, manual processes that slow things down and introduce unnecessary risk. SecureSignature gives you a better way. You'll reduce paper usage, improve turnaround times, and deliver a smoother experience to employees, partners, and customers.

It's not just about signing faster—it's about working better.
