# Why PF 360 Capture Data Validation Services?

## 100% Data Accuracy

Enhanced by a global team of experts who meticulously validate and double check your data.

## SOC 2 Type 2 Certified Security

Operating on Microsoft Azure for full compliance, your data is safeguarded every step of the way.

## Offshore & Onshore Services

Our partnership with a trusted offshore provider allows us to tailor the best solution for your needs.

## Scalability

Whether you have high volumes of data or frequent fluctuations, our platform adapts to your goals.

## Fast turnaround

Directly route documents to our data validation team, ensuring full process integrity and audit trails with minimal lag.

# How It Works

Whether it's data entry or validating extracted data, the **PF 360 Capture** platform allows you to configure workflows that route documents from any process for data validation.

With our team of experts and advanced AI, you'll receive accurate, validated data directly in your system—ready to use for critical decision-making.
