Process Fusion

About Us

Process Fusion is a software company and a cloud services provider.

Smart Delivery is a front-end Process Fusion application that leverages PF 360 Capture to digitize the process of managing package information.

PF 360 Capture is a Process Fusion solution that leverages intelligent document capture and automation to improve invoice processing.

At Process Fusion, our goal is to empower organizations by eliminating workflow bottlenecks, allowing them to focus on what matters the most — their bottomline.

Say Goodbye to Logistic Mix-ups 👋

And hello to seamless receiving, recording, and tracking with the tap of a few buttons.

Developed by Process Fusion, Smart Delivery is designed to make historical shipment tracking easier than ever.

Go digital with Smart Delivery.

Logistic Processing

Fingers cramped from writing down package details?

Not when you have an app that **scans and processes all the information for you**. For shipping and receiving.

With Smart Delivery

Automatic data capture

Automatic email notification to recipients

Digitally fetch recipient or location names

Plugged into PF 360 Capture for good receipt confirmation

Logistic Processing

Fingers cramped from writing down package details?

Not when you have an app that **scans and processes all the information for you**. For shipping and receiving.

Without Smart Delivery

Reliance on pen and paper

Higher chance for error
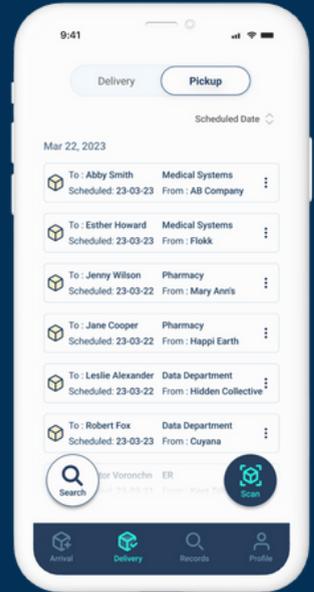

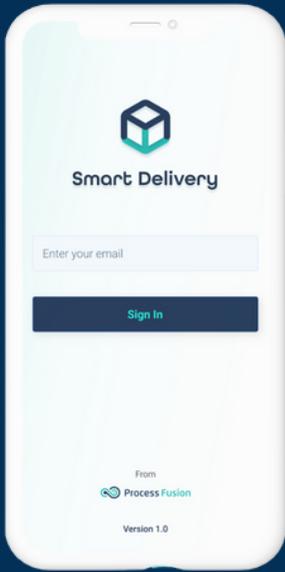

More time spent tracking information

Shipment processing and good receipt confirmation disconnected

Last Yard Delivery

Make last yard management hassle free
with Smart Delivery.

✓ ERP Integration

✓ Continue the journey to accounts payable

✓ Elimination of paper and scanning

✓ Tracking and reporting under one plaform

✓ Good receipt and delivery tracking
