STEP 4: Install a Test Printer On The UniPrint Print Server	9
STEP 5: Add the Test Printer In A User Session	10
Printing From An ICA/RDP Session	12

Introduction

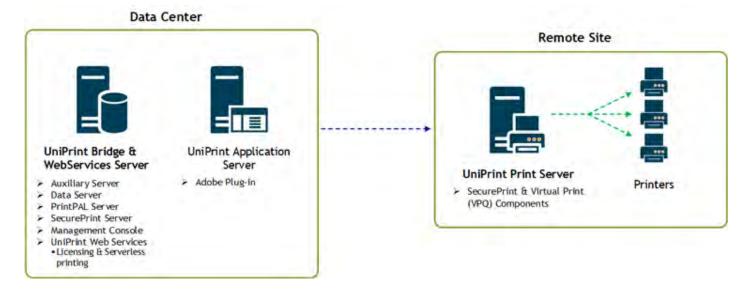

This step-by-step guide is intended for those who want set up UniPrint Infinity with minimal configuration. Only the necessary steps required to start printing from an ICA/RDP session will be covered. For additional assistance on customizing UniPrint Infinity or setting up many of UniPrint Infinity's features such as SecurePrint, Printer Delegation, Printer Profiles, Archiving, Statistics Monitoring and Mobile Printing refer to the UniPrint Infinity Administrator's Guide.

NOTE: To access advanced printer preferences, for example, stapling and hole punching, use Printer Profiles. For more information on setting up and using Printer Profiles, refer to the <u>UniPrint Infinity</u> Administrator's Guide.

This quick start guide is specific to environments that connect to Citrix/terminal servers using thin clients only or a combination of thin and thick clients and that use print servers. Only the components necessary to print through UniPrint Infinity will be installed and only instructions on printing from a user's session will be presented.

Installation Scenario

This scenario requires three servers and one client device. The first server will have UniPrint Bridge with the license server installed. The second server will have UniPrint Print Server installed. The third server will have UniPrint Application Server installed. The fourth computer will act as a client to connect to the application server for testing purposes and therefore does not require any UniPrint software to be installed.

Recommended System Requirements

Server 1: UniPrint Bridge requires one of the following supported operating systems and all of the roles and features listed:

- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022

Server 2: UniPrint Print Server requires one of the following supported operating systems and all of the roles and features listed:

- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022

Server 3: UniPrint Application Server requires one of the following supported operating systems:

- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- with Remote Desktop Services role installed

Recommended Installation Procedure

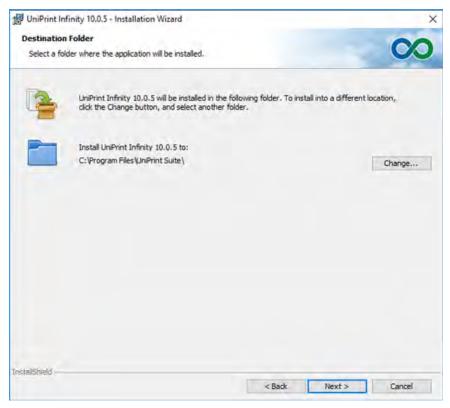

NOTE: The following instructions explains how to deploy UniPrint Infinity in a print server environment using the minimum number of computers. This installation scenario is designed and intended for testing purposes and does not reflect production best practices.

- Install UniPrint Bridge and UniPrint Web Services on Server 1.
- 2. Install UniPrint Print Server on Server 2.
- 3. Install UniPrint Application Server on Server 3.
- 4. Install a test printer on the UniPrint Print Server (Server 2).
- 5. Add the test printer in a user session. PrintPAL can be used to replace this step. See the <u>UniPrint Infinity</u> <u>Administrator's Guide</u> for instructions on how to set up PrintPAL.

STEP 1: Install UniPrint Bridge

- 1. On Server 1, run the installation program as an administrator.
- 2. In the UniPrint Infinity Installation dialog box, click Next.
- 3. In the License Agreement dialog box, click I accept the terms in the license agreement and then click Next.

4. In the **Destination Folder** dialog box, click **Next** to accept the default location for the UniPrint program files. Click **Change** to select a different location.

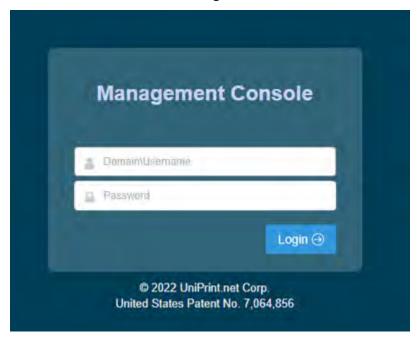

5. In the **Setup Configuration Type** dialog box, select **UniPrint Bridge** and then click **Next**. **NOTE**: By default, UniPrint Web Services will also be installed.

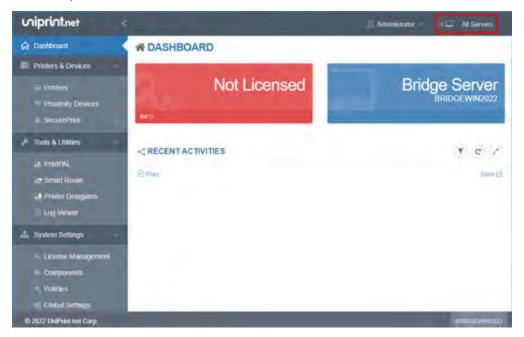

- **6.** Some components, for example, the Management Console and SecurePrint, require SQL Server to be installed. Click **Next**.
- 7. In the Ready to Install the Program dialog box, click Install. The UniPrint installer will copy files to the destination folder.
- 8. Click **Finish** to complete the installation.
- 9. Click and then click Management Console.

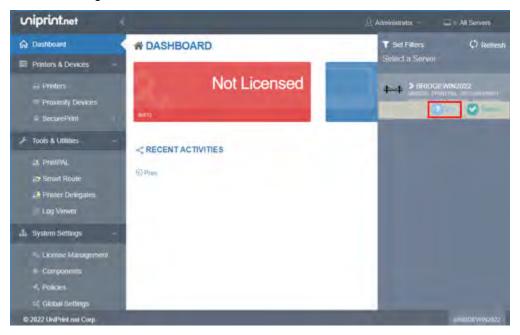

10. Enter administrative domain credentials and then click Login.

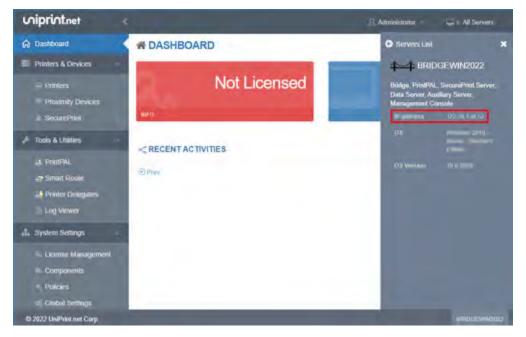

11. At the top of the console, click All Servers.

12. Mouse over the UniPrint Bridge and then click Info.

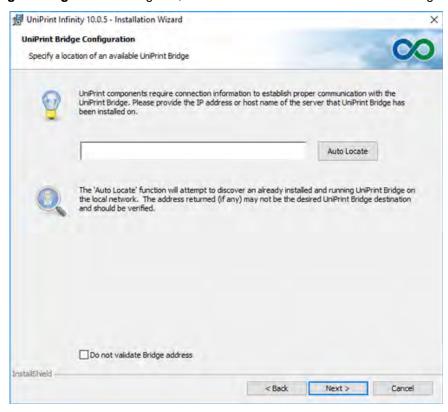

13. Take note of the IP address. This is required when installing the UniPrint Application Server.

STEP 2: Install UniPrint Print Server

- 1. On Server 2, run the installation program **UniPrint10_x*_Setup.exe** as an administrator.
- 2. In the UniPrint Infinity Installation dialog box, click Next.
- 3. In the License Agreement dialog box, click I accept the terms in the license agreement and then click Next.

- 4. In the Destination Folder dialog box, click Next to accept the default location for the UniPrint program files. Click Change to select a different location.
- 5. In the Setup Configuration Type dialog box, select UniPrint Print Server and then click Next.
- 6. In the UniPrint Bridge Configuration dialog box, enter the IP Address of the UniPrint Bridge and then click Next.

7. In the UniPrint Print Server Configuration dialog box, click Next.

- In the Ready to Install the Program dialog box, click Install. The UniPrint installer will copy files to the destination folder.
- 9. Click Finish to complete the installation.

STEP 3: Install UniPrint Application Server

- On Server 3, run the installation program UniPrint10_x*_Setup.exe as an administrator.
- 2. In the UniPrint Infinity Installation dialog box, click Next.
- 3. In the License Agreement dialog box, click I accept the terms in the license agreement and then click Next.
- **4.** In the **Destination Folder** dialog box, click **Next** to accept the default location for the UniPrint program files. Click **Change** to select a different location.

5. In the Setup Configuration Type dialog box, select UniPrint Application Server and then click Next.

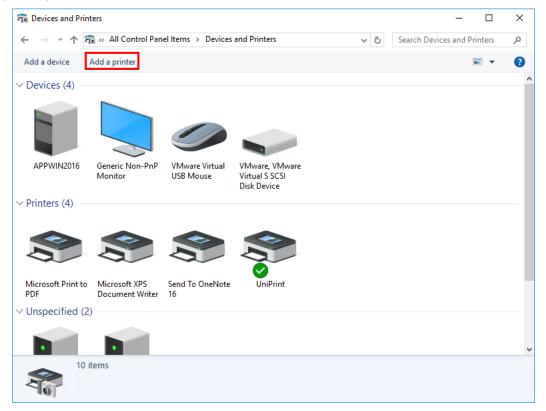

- 6. In the **UniPrint Bridge Configuration** dialog box, enter the **IP Address** of the UniPrint Bridge (License Server) and then click **Next.**
- 7. In the Ready to Install the Program dialog box, click Install. The UniPrint installer will copy files to the destination folder.
- 8. Click **Finish** to complete the installation.

STEP 4: Install a Test Printer On The UniPrint Print Server

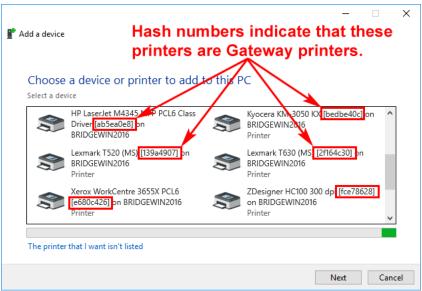

- 1. On the UniPrint Print Server (Server 2), open Print Management.
- 2. Add a printer to the local print server by following the printer manufacturer's instructions for installing their printer driver.
- 3. On the UniPrint Bridge, click and then click Management Console.
- 4. Enter administrative domain credentials and then click Login.
- 5. Under Properties & Settings, click Printers.
- **6.** Ensure that the test printer appears as type **Gateway**.

STEP 5: Add the Test Printer In A User Session

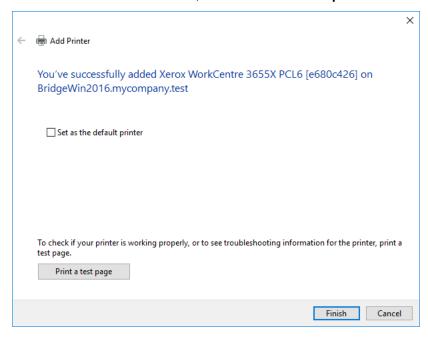

- 1. From a client device, log onto the application server as you normally would through RDP or ICA to access applications.
- 2. Click and then click Control Panel. Double-click Devices and Printers.
- 3. Click Add a Printer.

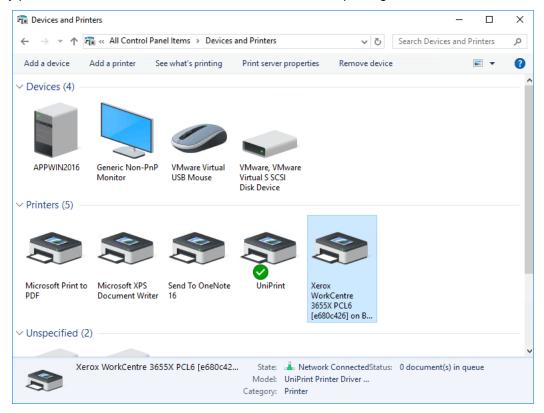

4. Click to select a Gateway printer which are usually indicated with hash numbers. Hash numbers are used to ensure that each Gateway printer is unique and for users they are good indicators that the printer is indeed a Gateway printer.

- 5. Click Next.
- 6. If you want this printer to be set as the session default, select Set as default printer and then click Finish.

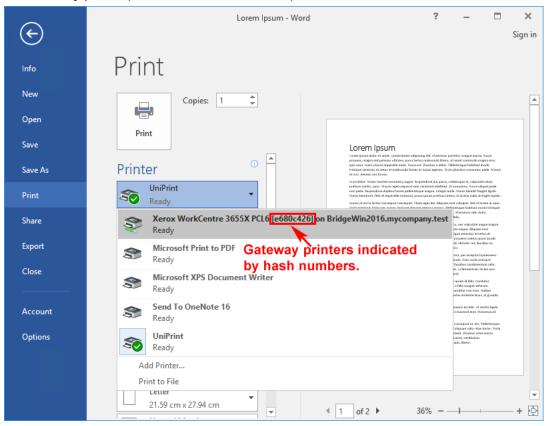

7. The Gateway printer is now added to the session and is available for printing.

Printing From An ICA/RDP Session

- 1. From a client device, launch an ICA/RDP session by logging onto the application server as you normally would to access applications.
- 2. Open an application from which to print, for example, Microsoft Word.
- 3. Print from the application. For example in Microsoft Word 2016, click the File tab and then click Print.

4. Select the test **Gateway** printer (one with the hash numbers).

5. And then click Print.

6. After 15 days from installation, the demo license will expire and any documents printed will have a watermark across each page. To remove this watermark, contact sales@processfusion.com to request an extended demo license or to purchase UniPrint Infinity.
