Protect Adult Patients from Flu and other Respiratory Diseases this Fall

As respiratory virus season is almost here, recommend flu, COVID-19, and RSV vaccines to your adult patients. Your patients are counting on your strong recommendation for:

- Updated [2024 - 2025 flu vaccine](#) for everyone 6 months and older. [Adults ages 65 years or older](#) are at higher risk of flu complications and should receive [higher dose flu vaccine](#).
- Updated [COVID-19](#) vaccines for everyone 6 months and older.
- RSV vaccine for all adults 75 years and older and those 60 - 74 years and at [increased risk of](#)

[severe RSV disease](#)

These vaccines help protect adults against associated complications and hospitalization. Even healthy adults may get severely ill if they have not been vaccinated – Just check out [Allison's story](#) about the dangers of flu.

Let's make sure our adult patients are getting their flu and other respiratory vaccines this season. Thank you for keeping Californians strong and protected!
