

February 8, 2022

Dear California Child Care Director,

Let's continue to keep staff and kids healthy by immunizing against flu and COVID-19. Those with chronic health conditions and children under 5 years of age are more vulnerable to serious complications from flu, COVID-19, and other respiratory diseases. With flu and COVID-19 still spreading, it's not too late to let parents and guardians know that **both vaccines are available for children 6 months of age and older, including the updated (bivalent) COVID-19 booster**. It is safe and convenient to get both at the same time. Encourage them to get their kids vaccinated using [these robocall templates](#) and more resources below.

We appreciate all that you do to keep staff and children stay safe!
