

February 8, 2022

Dear California School Administrator,

Let's keep students healthy and learning in classrooms by immunizing them against flu and COVID-19. With flu and COVID-19 still spreading, it's not too late to let parents and guardians know that **both vaccines are available for children 6 months of age and older, including the updated (bivalent) COVID-19 booster**. It is safe, effective, and convenient to receive flu and COVID-19 vaccines at the same visit. Encourage them to get their kids vaccinated using these [template letters](#) [robocall messages](#), and more resources below.

We appreciate all that you do to help our communities stay healthy and safe!
