### **Suggested Message: Flu and COVID-19 Vaccination for Children**

During respiratory virus season, continue sharing [messages](#) encouraging everyone 6 months and older to get the updated [flu](#) and [COVID-19](#) vaccines. Infants, toddlers and young children are at higher risk of getting very sick from the flu. Getting them vaccinated is a safe way to lower the risk of severe illness and hospitalization from respiratory viruses.

Visit [MyTurn.ca.gov](https://myturn.ca.gov) or talk to your health care provider to make a vaccine appointment.

Visit the CDPH [Flu and COVID-19 Vaccines Communication Toolkit](#) for more messages to share. And please [share the message!](#)

---

### **JYNNEOS® Vaccine Expiration Date Extension**

Mpox vaccine providers should note that the expiration date for four lots of JYNNEOS® vaccine have been extended for vaccine stored at -25°C to -15°C

(-13°F to +5°F). For more specific information please refer to this [CDPH communication](#).

## Novavax Vaccine Lots Expiring October 31, 2024

Novavax vaccine doses currently being shipped have an expiry of Saturday, November 30, 2024. **However, there are earlier shipped doses that expire on Thursday, October 31, 2024.** Providers should continue to use this vaccine right up until the expiry date.

Once expired, doses should be reported as expired waste in myCAvax and returned to McKesson, per usual.

Novavax will be requesting a shelf-life extension for doses that have an expiry of November 30, 2024, and beyond during the respiratory virus season. CDPH will notify providers if/when shelf-life extensions are granted. To minimize vaccine wastage, **we encourage placing smaller, more frequent orders and limiting quantities to the amount of vaccine that can be utilized within a two-week period.**

Providers may use the [Expiration Look-Up Tool](#) to obtain the most up-to-date vaccine expiry information.
