

## New CDC Guidance on Nirsevimab Use (01/05/2024)

In the setting of increasing supply, healthcare providers should administer a single dose of nirsevimab to all infants aged less than 8 months, as well as children aged 8 through 19 months at increased risk.

For providers who continue to have limited supply, nirsevimab should be prioritized to protect infants at highest risk for severe disease. Limited opportunities remain to prevent severe RSV. It is imperative to order, use, and reorder remaining supplies of nirsevimab as soon as possible. See [updated CDC nirsevimab guidance](#) for more details. For more information about options for optimizing RSV protection for infants, [refer to this resource](#).

## Reminder: New Refrigerated Pfizer COVID-19 Vaccine for 12y+

The previous Pfizer 12y+ vaccine allocations have been replaced with Pfizer's new refrigerated 12y+ vaccine (NDC 00069-2377-10), a new presentation in a carton of 10 manufacturer-filled syringes (MFS).

Providers who have the original Pfizer 12y+ vaccine on hand can and should continue to use this product until it is consumed, expired, or has been stored at 2-8°C for longer than the allowable 10 weeks.

Ordering for the new product was turned on Tuesday, December 19, 2023, and any orders placed since then are shipping this week (post-holiday shipping blackouts). See the [COVID-19 Vaccine Product Guide](#) for more details.

---

## 2024 Vaccines for Children (VFC) Recertification Now Available

Annual Recertification and training is a federal requirement to maintain active status in the VFC program and receive publicly purchased vaccines.

Recertification launched on December 20, 2023, and the due date is **Wednesday, January 31, 2024**. For more details refer to the following resources:

- [2024 VFC Recertification Frequently Asked Questions \(FAQs\) \(IMM-1245\)](#)

- [2024 VFC Recertification Process \(IMM-1277\)](#).
- [2024 VFC Recertification Worksheet \(IMM-1207\)](#).

## Update: California Immunization Registry (CAIR) Quick Entry

Since the My Turn Release 46 on Wednesday, December 20, 2023, CAIR Quick Entry allows users to submit, view, and edit vaccine administration data for most vaccines to Immunization Information Systems (IIS).

Users can inline upload vaccine administration data using CAIR Quick Entry (which may look similar to the existing inline upload process for vaccines in My Turn).

In addition to inline submission, users can upload vaccine administration data using CSV submission. After submitting a record, select data can be edited, including Location and Vaccine Information.

The screenshot displays the myCAVax interface. The top navigation bar includes Home, Clinics, Vaccine Inventory, Appointments, Enrollment, IIS Status, and More. A dropdown menu is open, highlighting 'CAIR Quick Entry' with sub-options 'Upload Records' and 'View/Edit Records'. Below the navigation, a 'Welcome to My Turn Clinic' banner is visible. The main content area shows three summary cards: 'Appointments by status', 'Completed appointments by vaccine', and 'Completed pediatric appt (<18 yrs)'. An inset window titled 'CAIR Quick Entry View & Edit Records' shows a search form with fields for Location Name, Clinic Name, Status, Submitted From, Submitted To, Vaccine Family, Manufacturer Name, Vaccine, DOB, Last Name, and First Name. Below the search form is a table with columns for Record ID, Created Date, IIS Status, Location N..., Clinic Name, Vaccine Fa..., Manufactu..., Vaccine, Date Admi..., First Name, Last Name, and Date of Birth. A single record is shown with Record ID 66, Created Date Dec 12, 2023, IIS Status Sample Locat..., Clinic Name Sample Clinic..., Vaccine Fa... Hepatitis A, Manufactu... GlaxoSmithKline, Vaccine Hevix-Adult, Date Admi... Dec 11, 2023, First Name James, Last Name Show, and Date of Birth Dec 1, 2005.

## Reminder: COVID-19 Medications Transition to Commercial Marketplace

While previously available free of charge, patients will start to see cost-sharing and co-pays for all COVID-19 medications (like all prescribed drugs) once the U.S. Government (U.S.G.) purchased product supply has run out.
