CDPH Continues Efforts to Protect All Californians at Risk from COVID-19 Disease

CDPH recommends that all individuals age 6 months and older should have access to and the choice to receive currently authorized COVID-19 vaccines, with an emphasis on protecting higher risk individuals, such as infants and toddlers, pregnant individuals, and others with risks for serious disease.

For more information on COVID-19 vaccines, hospitalization data, immunizing children and pregnant persons, and recent federal policy changes, please refer to the CDPH Immunization Updates for Providers Webinar, Friday, June 13, 2025, slides 27 – 40 ([slides](#) | [recording](#)).

From CDPH Office of Communications

Protect Yourself from Shingles

1 in 3 people in the United States will develop shingles, which can cause a painful rash and long-term nerve pain. People over 50 and adults under 50 with weakened immune systems can get vaccinated to stay protected.

[CDPH Zoster \(Shingles\) Webpage Link](#)

Protect Yourself from Bird Flu

Updated flyers are available in the Bird Flu Communications Toolkit. The flyers share information with farm workers about how to protect against bird flu when working with infected dairy cows or poultry. Visit the toolkit for more messages and resources to share.

Next Week! Critical Conversations Webinar: Vaccine Preventable Diseases – What’s Old Is New Again

Join Dr. Jasjit Singh, Pediatric Infectious Disease sub-specialist at Children's Hospital Orange County (CHOC), who will be reviewing protocols for identifying and managing vaccine preventable diseases that we thought were in the rear-view mirror but are now posing a new threat to our communities. We see you measles, pertussis, Hib and polio!

[Register](#) for the webinar on Friday, June 20, 2025, at 12:00 pm – 1:00 pm (PT)
