Timing and Administration of COVID-19, Influenza, and RSV Immunizations

| | AUG | SEP | OCT | NOV | DEC | JAN | FEB | MAR | APR | MAY | JUN | JUL |
|-------------------------------------|---------------------------------|---|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| COVID-19 | Administer as soon as available | | However, can be given any time of the year to people eligible for vaccination | | | | | | | | | |
| Flu | | Ideally administer early fall ¹ | | | | | | | | | | |
| Older adults RSV vaccine | | Ideally administer late summer/ early fall | | | | | | | | | | |
| Maternal RSV vaccine | | Administer September through January in most of the continental U.S. ² | | | | | | | | | | |
| OR | | | | | | | | | | | | |
| Infant RSV immunization, nirsevimab | | | Ideally administer October through March in most of the continental U.S. ² | | | | | | | | | |

¹ Children who need 2 doses should receive their first dose as soon as possible (including during July and August). One dose of flu vaccine can be considered for pregnant people in their third trimester during July and August.

² In jurisdictions with RSV seasonality that differs from most of the continental United States, including Alaska, southern Florida, Guam, Hawaii, Puerto Rico, U.S.-affiliated Pacific Islands, and U.S. Virgin Islands, providers should follow state, local, or territorial guidance. However, nirsevimab may be administered outside of routine seasonal administration (ie., October through March) based on local RSV activity and other special circumstances.

Vaccines for Children (VFC) Vaccine Ordering Updates

COVID-19 Vaccine Ordering

VFC providers should continue ordering COVID-19 vaccine for their practices. For the VFC Program, COVID-19 vaccine product availability for the 2024 – 2025 season is as follows:

- Novavax: This product is no longer available for ordering. Latest doses that were distributed expired on April 30, 2025, and any remaining expired doses must be returned to McKesson.
- Pfizer and Moderna vaccines remain available for ordering with the following expiry parameters:

- Pfizer:
 - 6m-4y, 5-11y vaccine will have a minimum shelf life of 3 months upon delivery; viable for 10 weeks in the refrigerator
 - 12y+ vaccine has an expiry of September 6, 2025
- Moderna:
 - 6m-11y vaccine has an expiry of September 12, 2025
 - 12y+ vaccine has an expiry of September 14, 2025

2024 – 2025 Flu Vaccine Ordering

The last day to order VFC flu vaccine for the 2024 – 2025 season is June 10, 2025. Most flu vaccine will expire on June 30, 2025, and the CDC will stop flu vaccine shipments 2 weeks prior to expiry. Ordering for flu vaccine will resume in the fall.
