Update to Shingle Product Impact Resistance Classifications

October 2, 2023

Dear Valued Customer:

We are pleased to announce that all products listed below, for all locations where they are produced, have successfully passed testing to be considered both UL 2218 and FM 4473 Class 3 rated for Impact Resistance.

Products Now Rated Class 3:

- TruDefinition® Duration®
- TruDefinition® Duration® Designer
- Duration® Premium
- TruDefinition® Duration Max®
- TruDefinition® Duration® Cool
- TruDefinition® Duration® Cool Plus
- ProEdge® Hip & Ridge Shingles
- DecoRidge® Hip & Ridge Shingles

This change applies to all products listed above produced in or after 2022 for products sold both in the United States and Canada.

There will be no 'Do Not Mix' implications based on this change. All products will be mixable unless otherwise noted in additional customer letters and/or on notices adhered to the packages (as always check lot numbers to confirm mixability).

Packaging and labeling updates related to this rating will be completed through early 2024 and updated samples and literature highlighting the rating will take place as a rolling change over the next few months.

Please contact your Owens Corning Roofing Area Sales Manager, email answers.roofing@owenscorning.com, or or call 1-800-Get-Pink® (1-800-438-7465), if you have any questions. Thank you for selecting an Owens Corning roofing product.

Sincerely,

Nicole Howe
Residential Shingles Product Manager
