Turn a Sentence into a Working App in Five Minutes.

AI-powered app building, connected to your business data and processes.

When a new checklist, dashboard, or workflow doesn't exist, teams either wait on development or rely on spreadsheets and manual workarounds.

AI Studio: Deploy custom apps everywhere

Connect your apps to Microsoft D365, your EAM, MES, ERP, CRM, HCM, DMS, and other business systems, deploy them across desktop, phone, and tablet, and write approved updates back to your core system.

Describe what you need in plain language, refine the result, and publish it for the workers who need it.

Describe → Build → Refine → Approve → Publish → Monitor

Build apps that work across the shop or the field

Connectors, done once

Connect Microsoft D365 and other MES, SCADA ERP, CRM, and HCM systems with scoped permissions, then make those approved connections available where they're needed.

Computer use, when there's no API

Give a Star Agent its own browser to work directly inside applications, with human takeover whenever it's needed.

Star Agents that keep working behind apps

Persistent, role-based AI agents with memory that monitor, coordinate, and act continuously with user actions.

Governance & control

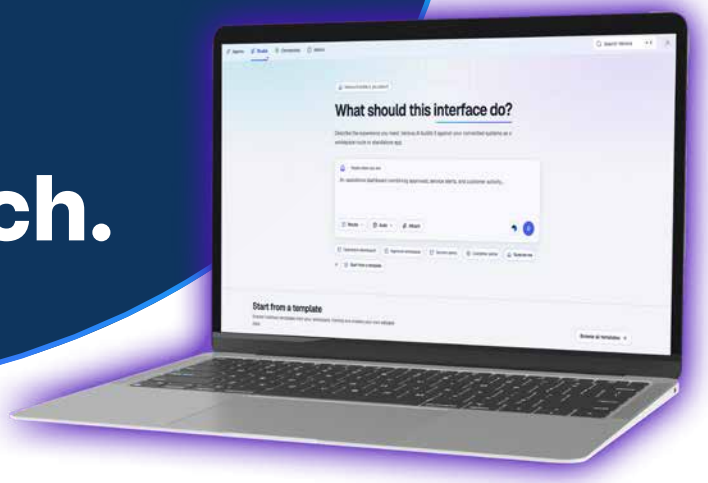

Manage permissions, approvals, budgets, and AI usage with built-in guardrails and audit trails

Interfaces with your specific organizational needs

Describe the screen you need and Studio builds it against your IT and OT data solutions.

Verosoft

Your backlog, cleared by lunch.

Describe it and the builder delivers it. Connected, governed and live.

- Describe it with a sentence, a sketch, or a template
- Get a working app in minutes, already wired to your systems
- Shape it live with AI engineers and operational experts in the room
- Run approvals, routing, and write-backs on their own, day and night
- Skip the rebuild, the builder can propose the app your workflow already needs
- Control access, approvals, cost, and audit from one place

Production Recovery Planner | Equipment Anomaly Detector | Shift Handover Assistant | Qualified Crew Scheduler

OT Troubleshooting Assistant | Multi-Site Operations Monitor | Automated production planner | Quality Issue Investigator

Save $60k–$235K a year

by replacing traditional custom app development with Verovia

*based on the average cost of a custom app in the industry

Prove it in your own environment

Deploy a governed workflow on your live systems for **free**, with no migration required.
