Tackle Downtime with AI-Powered Enterprise Asset Management (EAM)

Transform Your Asset Management with TAG Mobi

Stay ahead of failures, extend asset lifecycles, and streamline maintenance —all within Microsoft Business Central.

Prevent Downtime
Keep your assets running smoothly with AI-powered predictive maintenance. Avoid unexpected breakdowns and keep your operations moving forward.

Maximize Asset Performance
Extend asset life and improve reliability with intelligent, AI-driven maintenance management, efficient inventory strategies, and streamlined work order management.

More Wrench Time
Let AI handle data entry, forms, and reports so your team spends more time on repairs and less time on the keyboard.

mobi Mentor AI

Powered by agentic AI

mobiMentor AI brings intelligent automation to every shift, removing the admin burden that slows teams down. With voice-powered workflows and maintenance-trained agents, your operation runs faster, smoother, and at a lower cost.

Asset Lifecycle Management
✔ Improve asset performance and longevity

Preventive & Predictive Maintenance
✔ Avoid costly failures

Work Order Management
✔ Dispatch, track and complete tasks effortlessly

Inventory and Spare Parts Management
✔ Ensure spare parts are available when needed

Mobile and Remote Access
✔ Stay connected to assets and teams from any device

Advanced Analytics & Reporting
✔ Dashboards to track progress and uptime

IoT & Real-Time Monitoring
✔ Receive insights and alerts before issues arise

Field Services Management
✔ Coordinate technicians and service activities efficiently

GIS Integration
✔ Enhance planning with geospatial insights

Preventive Maintenance Embedded in Microsoft Business Central

TAG transforms Microsoft BC into a powerful maintenance and asset management tool, helping you reduce downtime, cut costs, and boost efficiency—all in one database.

- ✅ **Work orders, preventive maintenance, and analytics** are part of your core system

- ✅ **No extra logins or complex integrations**—manage assets directly within BC

- ✅ Enjoy **a mobile-optimized user experience** while effortlessly integrating with BC

- ✅ Integration with **Power Platform**

> **With The Asset Guardian (TAG), our downtime has dropped more than 38%**, compared with prior to implementing CMMS, which adds to the return on investment or the revenue that we're making.

Discover TAG Mobi

IoT-Powered Predictive Maintenance & Automation

Unplanned downtime is a direct hit to profitability. Every unexpected failure leads to lost productivity, expensive emergency repairs, and operational disruptions that impact the bottom line. **TAG Mobi prevents that** by continuously monitoring asset health, helping your business shift from reactive maintenance to proactive strategies that keep operations running smoothly.

- **Live Monitoring:** Get real-time asset insights
- **Risk Thresholds:** Detect issues before failures
- **AI Alerts:** Instant notifications for quick action
- **Smarter Scheduling:** Prioritize at-risk assets
- **Less Downtime:** Stop small issues early
- **Longer Asset Life:** Prevent wear and failure
