

Construction Insurance Solutions

The foundation you need for success.

Construction has always been high-risk – it's closely regulated, competitive and dangerous. One wrong move can grind work to a halt. From standard exposures like natural disasters, new vulnerabilities from technology, and challenges attracting skilled labor, HUB can help protect against the financial impact of the unexpected. We have a team of seasoned construction specialists who put you at the center of everything we do, so you can focus on your business and projects.

Whether you're working on commercial, residential, environmental or infrastructure projects, we offer tailored solutions that can reduce your overall insurance costs, while helping you assess job safety protocols to decrease your risk. We can partner with you from bidding to completion and build a program to satisfy your performance, payment, and other bond requirements.

Our team of construction experts is here to protect and advocate for your business. Together, we'll create a customized risk management and insurance strategy that lays the foundation for your continued success.
