

Tableau to Power BI Migration

Netwoven Inc. offers a strategic migration from Tableau to Power BI, designed to optimize your analytics capabilities, reduce costs, and enhance data governance.

Why Move from Tableau to Power BI

- 20% - 70% Reduction in TCO: Significantly lower total cost of ownership.
- Microsoft 365 Integration: Power BI is included for Microsoft 365 users, leveraging existing investments.
- Integrated Copilot AI: Advanced AI features for enhanced analytics.
- Unified Platform: Seamless integration with Microsoft 365, Azure, and Power Platform.
- Enterprise Governance: Robust governance through Microsoft Entra ID and Purview.

Current State

- Multiple disparate analytics tools
- Manual reporting processes
- Decentralized data management

Challenges

Inefficient and expensive operations.

Future State

- Single, unified analytics platform
- Improved reporting efficiency
- Enhanced data governance
- Better user experience

Benefits

Streamlined operations and cost savings.

Steps to Migration

- Inventory existing reports and datasets
- Establish data model mappings
- Identify dependencies and complexities
- Develop detailed migration plans and timelines
- Execute migration with minimal disruption
- Leverage proprietary semi-automated accelerator
- Rigorous testing of migrated assets
- Performance tuning and optimization
- Rollout access to migrated dashboards and reports
- User training and continuous support

Feasibility Assessment

- Migration complexity analysis
- Data migration challenges
- Migration timeline calculation

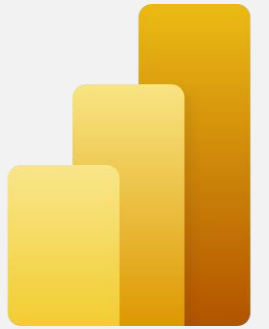

Next Steps

- **Transition Analysis:** Evaluate current Tableau usage
- **Data Migration Challenges:** Identify potential challenges
- **Power BI Optimization:** Provide recommendations

Evaluate the transition from Tableau to Power BI with a complimentary feasibility assessment, including an analysis of current Tableau usage and identification of data migration challenges. Recommendations for optimizing Power BI implementation will be provided.

How to Get There

- Design & Preparation
- Planning & Assessment
- Migration Execution
- Validation & Optimization
- Deployment & Adoption
