

# Slack to Microsoft Teams Migration with Netwoven

## Overview

Microsoft 365 includes Microsoft Teams at no extra cost—unlike Slack. Migration improves collaboration, security, and efficiency. With 20+ years’ experience, Netwoven ensures a smooth Slack-to-Teams transition using Microsoft Graph API and custom solutions to reduce risks and boost adoption.

## Netwoven’s Migration Approach

Our process supports teams of all sizes, with baseline and add-on phases:

1. **Baseline Phase:**

Assessment (workshops, channel analysis, prototyping), infrastructure setup, bulk migration (channels, messages, threads, files, timestamps, emojis), delta migration, and hyper care.
2. **Add-On Phase:**

Extra messages, workflow automation, custom integrations, extended training, and advanced features (DM archiving, external user setup).

## Netwoven’s 7-Phase Framework for Risk-Free Migration

Phase	Description
1. Discovery & Assessment	Inventory Slack workspaces, channels, DMs, apps, and usage patterns.
2. Governance & Planning	Define Teams architecture, permissions, compliance, and retention policies.
3. Prototype Migration	Migrate sample data to validate fidelity, authorship, timestamps, and formatting.
4. Workshops & Decision Making	Conduct stakeholder sessions to finalize scope, mapping, and timelines.
5. Full & Delta Migration	Execute bulk and incremental migrations using automated tools.
6. Go-Live & Hypercare	Transition users, monitor adoption, and resolve post-migration issues.
7. Adoption & Change Management	Train users, share guides, and drive Teams engagement.

## Key Benefits of Teams Over Slack

- ✓ Integrated with Microsoft 365 for seamless agility and IT management.
- ✓ Enhanced security, compliance, and smarter teamwork.
- ✓ Custom apps for archived chats with search functionality.
- ✓ Proven results: Preserve message authorship, attachments, and threads

## Why Executives Choose Netwoven

- ✓ 15+ Years of complex enterprise migrations
- ✓ 99.7% data fidelity across channels, threads, and metadata
- ✓ Microsoft Solutions Partner with specialized Teams + Graph API expertise
- ✓ Zero Downtime Strategy with weekend cutovers and rollback planning
- ✓ People-First Model to reduce resistance and boost adoption rates

## Schedule Your Slack to Teams Migration Assessment
