

EXECUTIVE BRIEFING · EBOOK

Mission Under Pressure.

How non-profits deliver VDR-grade trust inside Microsoft 365 - without paying for a second platform.

President & CEO, Netwoven · Product Owner, Govern 365

The trust problem is here.

Non-profits are now squarely in the attacker's sights - and the data they hold is the most valuable they have.

THE NAMES YOU ALREADY KNOW

ICRC

515,000 vulnerable people exposed. Restoring Family Links program.

Blackbaud cascade

World Vision, Save the Children, HRW, WFP-USA - via a single vendor.

Little Red Door

Cancer charity ransomed. Federal grants pulled. Years of recovery.

Two bad options. One real answer.

Most non-profits have been forced to choose between fast-and-indefensible or defensible-and-unaffordable. There is now a third path.

At TSI pricing.</p> </div> <ul data-bbox="1290 773 1684 969" style="list-style-type: none"> • Identity-bound via Entra ID • Persistent labels via Purview • Tenant-wide unified audit log • Inside the tenant you operate • Tech for Social Impact pricing

A VDR is an outcome, not a tool.

When a board chair, foundation officer, or auditor asks for a "data room," they are describing four outcomes. Deliver them any way you want.

PILLAR 1

Controlled Access

Identity-bound, not link-based. When someone leaves the matter, access ends the same day. Verified at every session.

PILLAR 2

Persistent Protection

Sensitivity labels travel with the file. A board pack forwarded outside still refuses to open for the wrong viewer.

PILLAR 3

Evidence-Grade Audit

Every access event captured and queryable. "Who saw Document X this quarter?" becomes a one-click answer, not a project.

PILLAR 4

Clean Close-Out

When the matter ends, materials retain on policy, access is revoked, and a defensible record set is preserved. Not by attrition.

Six places this shows up in your week.

These are the scenarios that disproportionately consume non-profit time, money, and trust.

Board Governance

Executive sessions · CEO comp
Conflict-of-interest · Investigations

Donors & Campaigns

Major gifts · Anonymous donors
Schedule B · Capital campaigns

Grants & Audits

Federal grants · Foundation grants
A-133 audits · IRS exams

M&A & Affiliations

Mergers · Joint operations
Diligence · Dissolutions

Beneficiaries & Field

HIPAA · Refugees · Survivors
Country residency · NGO field

Legal & Investigations

Executive search · Misconduct
Litigation hold · Whistleblower

Inside the tenant you already operate.

Govern 365 turns Microsoft 365 into the most credible secure-collaboration platform in the sector.

Four phases. One operating discipline.

Every secure-collaboration matter moves through the same lifecycle. Govern 365 makes it routine.

THREE DISCIPLINES THAT MAKE IT REAL

Identity-bound access

Not link-based. A trustee who rolls off is out the same day.

Protection that travels

A board pack opened on the wrong laptop refuses to render.

Evidence-grade audit

"Who saw this?" answered in minutes, not weeks. Every time.

Talk to a non-profit specialist.

A 30-minute call that ends with a one-page assessment — regardless of where you go next.

1 Discovery call

30 minutes. We map your current state to the four pillars and confirm Tech for Social Impact eligibility.

2 Deployment in 24 hours

Deploy Govern 365 in 24 hours in your Microsoft 365 tenant and get started with a short overview.

3 30-day pilot

Pick your scenario. Use the product for 30 days. If you like it, pay your invoice after 30 days and continue using OR cancel it with no cost incurred.
