

# Safeguard Sensitive Content with Govern 365 Legal Data Room Solution

**Create Virtual Data Rooms in Microsoft 365 Teams and SharePoint  
using the software you own and love to share and collaborate securely**

## Challenges with Data Security

**Legal and Compliance  
leaders are concerned  
about Cybersecurity risk**

**Organizations say  
at least half of  
their data is 'dark'**

**Departing employees  
take company data**

**Organizations  
struggle to detect  
data thefts**

- Challenges in maintaining Data Sovereignty when sharing externally
- Control of files is lost if sharing unencrypted files with 3rd parties
- Lack of audit trail and activity monitoring features

**Govern 365  
automates file  
security to reduce  
human error**

## Govern 365 vs. Competitors

### Govern 365

- Automates file security to reduce human error
- Native encryption using Microsoft Purview
- Native SharePoint Online repositories
- Existing Identity management system
- Automated repository and file lifecycle management
- Automated labeling and encryption of content
- Built-in alerts, notifications, and audit history

### The Market

- Redundant proprietary third-party encryption technologies
- Third-party cloud storage repositories
- Independent identity management systems
- Complicated content lifecycle Management
- Lack of auto-classification of content
- Lack of alerts, notifications, and audit trail

## Why Govern 365?
