Security and Compliance

Extend Data Protection and Governance across Apps, Endpoints, and Platforms

How Secure is your Organization?

✔ Do you know who is accessing your data?

✔ How do you feel about security of your organizational data?

✔ Are all users empowered to work securely anywhere at any time?

✔ Can you quickly find and react to a security breach?

Microsoft recognized Netwoven for extending the capabilities of Microsoft Information Protection (MIP) suite

Member of
Microsoft Intelligent
Security Association

Microsoft

With remote and hybrid work becoming a norm, mobility and security, no doubt, play pivotal roles in enhancing employee productivity. At the same time, it also increases the vulnerability and security concerns of organizations. Proactive protection and security of your IT environment is critical to your business.

Netwoven delivers the right, cost-effective security solutions for your organization, in alignment with your digital transformation journey and helping you minimize risk. Netwoven offers Managed Security Services for all your infrastructure and security needs, backed by our Gold Enterprise Mobility Management Competency amongst others.

Services

Identity and Access Management

Are you aware of suspicious user and sign-in behavior in your environment? Are you threatened by ongoing suspicious requests?

Learn more →

Endpoint Management

How are you managing your mobile devices and other user endpoints? Are your user's devices compliant with your IT policies?

Learn more →

Information Protection and Compliance

Success of a good Sensitive Information Protection program begins with defining your strategies (Information/Protection/Organization/Technology/People) and well-defined metrics for implementation.

Learn more →

Security Operations

Security information and event management (SIEM) solutions built for yesterday's environments struggle to keep pace with today's challenges, let alone tomorrow's unimagined risks. That's why Microsoft developed Azure Sentinel, a fully cloud-native SIEM.
