Challenges with data security

52%

Legal and Compliance leaders are concerned about Cybersecurity risk

42%

Organizations say at least half of their data is 'dark'

72%

Departing employees take company data

70%

Organizations struggle to detect data thefts

- Challenges in Maintaining Data Sovereignty When Sharing Externally
- Control of files is lost if sharing unencrypted files with 3rd parties
- Lack of audit trail and activity monitoring features

Govern 365 vs. Competitors

Govern 365

- Automates file security to reduce human error
- Native encryption using Microsoft Purview
- Native SharePoint Online repositories
- Existing Identity management system
- Automated repository and file lifecycle management
- Automated labeling and encryption of content
- Built-in alerts, notifications, and audit history

The Market

- Redundant proprietary third-party encryption technologies
- Third-party cloud storage repositories
- Independent identity management systems
- Complicated content lifecycle Management
- Lack of auto-classification of content
- Lack of alerts, notifications, and audit trail
