

# 5 Tips for A Modern Intranet with Microsoft 365

Intranet Software Market is projected to reach USD \$ 36.89 Billion by 2027. Modernizing your intranet with Microsoft 365 can significantly enhance the user experience compared to traditional on-premises intranets.

# 1

## Leverage SharePoint Online for Intranet Sites

Use SharePoint Online to create and host your intranet sites. SharePoint Online provides a collaborative and scalable platform with features like document management, version control, and integration with other Microsoft 365 apps. Utilizing modern SharePoint site templates can give your intranet a fresh and intuitive look.

# 2

## Customize with Modern Web Parts

Take advantage of modern web parts in SharePoint Online to create visually appealing and interactive intranet pages. You can use web parts like News, Quick Links, Yammer, and Events to keep users engaged and informed. These web parts are easy to configure and offer dynamic content updates

80%

Did you know that over 80% of the Fortune 500 companies use #SharePoint for their business needs?

### 3 Implement Microsoft Teams Integration

Integrate Microsoft Teams with your intranet to foster collaboration and communication. You can embed Teams channels, chats, and meetings directly into your intranet pages. This enables users to access team discussions and collaborate seamlessly within the intranet.

### 4 Personalize the User Experience

Make use of Microsoft 365's personalization capabilities to tailor the intranet experience for each user. You can use the Microsoft Graph to surface personalized content recommendations, such as relevant news articles, documents, or events, based on a user's role and activities within the organization.

## 5 Mobile Optimization and Accessibility

Ensure that your intranet is optimized for mobile devices and adheres to accessibility standards. Microsoft 365 tools and templates are designed with responsiveness in mind, so your intranet should be accessible and functional on various devices and for users with disabilities. Conduct usability testing to gather feedback and make improvements.

## Intranet Modernization and Digital Employee Experience

The new intranet was deployed successfully and customer was very pleased with the outcome. Employee feedback has been very positive and engagement is at an all-time high through the Viva Engage platform. The company saved over \$200k annually in Jive licensing and has seen significantly reduced employee frustration with finding content.

## Bonus Tip: Continuous Training and Support

Provide ongoing training and support for your users to ensure they can effectively navigate and utilize the modern intranet. Microsoft offers a wealth of resources and online training modules for Microsoft 365, which can help users become more proficient in using the platform.

By implementing these tips, you can create a modern intranet with Microsoft 365 that not only enhances the user experience but also promotes collaboration, productivity, and engagement within your organization.

41%

**Around 41% of businesses don't have any way at all of tracking how much of the content of their internal communication is seen by employees.**
