

Plan strategically

Get clear visibility into your Dynamics 365 investment with accurate license cost estimates and implementation effort breakdowns. Know upfront what resources you'll need from both implementation partners and your internal team.

Budget accurately

Know exactly what you're investing before you commit. Receive transparent breakdowns of licensing costs, implementation effort, and resource requirements—both internal team commitments and external partner needs—so there are no budget surprises down the road.

Gain buy-in

Present professional estimates to stakeholders with credible cost and effort projections. Make informed decisions quickly with data-driven insights that help secure project approval and alignment.

Plan smarter, move faster

Get a fast, tailored estimate for your Dynamics 365 implementation to plan smarter and move faster.

Looking to modernize your operations with Microsoft Dynamics 365 but unsure where to start? You're in the right place.

Why use this tool?

Built using industry benchmarks and Reach's proven implementation expertise from hundreds of successful Dynamics 365 deployments.

- **Plan your Dynamics 365 rollout** with complete clarity and confidence
- **Understand licensing and resource requirements** before you commit
- **Make informed decisions** quickly and confidently with data-driven insights
- **Avoid implementation surprises** with accurate effort estimates
- **Align stakeholders** with transparent cost and timeline breakdowns
- **Accelerate project approval** with professional estimates and documentation
