# CyberPort

Cyber risk solutions for  
portfolio companies

Portfolio companies face increasing cyber threats and higher expectations from clients, regulators, boards, and capital providers. A cyber incident can quickly turn into operational downtime, delayed revenue, reputational damage, and high response costs — often at the worst possible time.

CyberPort® is designed to help portfolio companies understand, measure, manage, and respond to cyber risk. The platform is built for real-world operations, with the aim of helping organizations improve resilience, simplify complexity when managing constantly evolving cyber risks, enhance financial efficiency, and align coverage and services to the actual risks organizations face.

### **Cyber protection built for portfolio companies**

Cyber insurance is a key part of a resilient cyber risk program — but not all policies and solutions are the same. The coverage terms and conditions, supporting service offerings, and claims experience all materially affect outcomes. CyberPort helps to improve breadth of coverage, placement efficiency, and potential incident recovery for portfolio companies.

As a Marsh proprietary offering tailored specifically for portfolio companies, CyberPort, in conjunction with the expertise of Marsh's Private Equity, M&A Practice (PEMA) team, helps portfolio companies achieve stronger terms and conditions than many standalone placements.

**Why it matters:**

Private equity-backed companies report an average financial impact of approximately [\\$2.1 million](#) per cyber incident.

## At a glance: Benefits and features

### **Best-in-class coverage built for portfolio companies**

- Proprietary CyberPort policy designed for portfolio companies
- Significantly improved terms and conditions versus typical market structures generally available
- Streamlined excess placement (including London facility placement options)
- Reinstatement options available after a claim
- Additional coverage for unique CISO exposures

### **Enhanced cost efficiency and claims outcomes generally offer better financial results and faster recovery**

- Better than average savings versus market using the Marsh cyber process
- Dedicated Marsh cyber claims advocacy
- Cyber loss control services to help improve claim outcomes
- Streamlined business interruption recovery prior to proof of loss

Coverage, pricing, and terms are subject to underwriting and depend on the insured's risk profile.

## Actionable insights and analytics

CyberPort includes analytics and loss control support to help organizations make confident decisions about where to invest, how to measure progress, and how to explain their posture to stakeholders. It combines best-in-class modeling tools at the fund and portfolio company level with a digital [cyber self-assessment \(CSA\)](#) tool that serves as a single-entry point to deeper analytics and insights.

## Cyber security/loss control

Our team of specialists understands that managing technology and cyber risk is not just about insurance. Mature cyber risk management begins with robust cybersecurity solutions and insights that act as the first line of defense against cyber threats. For this reason, Marsh Cyber supports portfolio companies with cybersecurity/loss control services provided by career cybersecurity professionals who can help contextualize cyber risk to drive better outcomes on insurance programs and help prioritize cybersecurity investments.
